<p>:Goals and Objectives</p>
<p>General Course Goals: Science is a discipline that helps students learn about God’s creation and design. By studying in this course, students will be able to defend their faith and appreciate the world. In understanding the specific objectives, students will be able to explain concepts of how things work and are designed.</p>
<p>Specific Objectives: Physical science is a general introduction to both chemistry and physics. This course will focus more on scientific concepts and vocabulary rather than incorporating difficult mathematic problems or advanced studies. Students will investigate magnetism and how it relates to electricity. They will continue their studies with periodic phenomena, explaining and exploring sound and light. The course will conclude with an introduction to chemistry, preparing the students for future courses.</p>

<p>:Goals and Objectives</p>
<p>General Course Goals: Science is a discipline that helps students learn about God’s creation and design. By studying in this course, students will be able to defend their faith and appreciate the world. In understanding the specific objectives, students will be able to explain concepts of how things work and are designed.</p>
<p>Specific Objectives: Physical science is a general introduction to both chemistry and physics. This course will focus more on scientific concepts and vocabulary rather than incorporating difficult mathematic problems or advanced studies. Students will investigate magnetism and how it relates to electricity. They will continue their studies with periodic phenomena, explaining and exploring sound and light. The course will conclude with an introduction to chemistry, preparing the students for future courses.</p>
<p>Evaluation & Assessment</p> <ol style="list-style-type: none"> 1. 20% - Mid-Term 2. 20% - Final Exam 3. 20% - Homework 4. 10% - Project 5. 20% - Quiz and Chapter Test 6. 10% - Participation / Behavior (5~20% - Participation / Behavior Biweekly or quarterly)
<p>Project(PBL) & Activities</p> <p>Each section covered will include either a demonstration and/or experiment. Students will do a research project that incorporates their course of material. The project must demonstrate that the student fully understands the concepts learned in class.</p>
